Tech Valley Game Space

TVGS

Board Meeting Minutes

This meeting of the Tech Valley Game Space Board of Directors was held on Monday, Sep 14, 2026.

The following members of the board were in attendance via teleconference:

- Taro Omiya (Chair of the Board)
- Tom Carmona (Vice-Chair, Treasurer)
- Jamey Stevenson (Executive Director)
- Jordan Faas-Bush (Secretary)
- Heath Gartner

Meeting duration: 1:19

The board has a quorum at 6:12 pm and the meeting started.

Pulled August's minutes approval to its own agenda item.

6:14 Heath motioned to approve the consent agenda, Tom seconded. 4 ayes no nayes the July minutes are approved.

Discussed rephrasing some sentences in the August items.

6:22 Tom motioned to approve and Heath seconded. 4 ayes no nayes the August minutes are approved.

6:22 Tom started an update on the educational programs we're contributing to.

Jamey gave an update on the educational programs we're running.

Tom has been talking to the Questar leadership about the TVGS+Questar agreement, Jamey has been talking to the school about his situation as a teacher. Jamey and Tom had notified them that Jamey was looking for more confirmed hours to teach at the level of quality he wanted. While they were able to raise the number of hours, unfortunately they opted to offer fewer than Jamey felt was necessary for him to be the teacher. Jamey put in his resignation with Questar because of that (although he will be teaching for the first chunk of the school year as part of his 30 days notice). They did agree with our concerns about AI/LLMs and feeding the curriculum into any such tools, so it can't be used to train anything along those

lines. They also agreed that the TVGS license to use our curriculum and Jamey's teaching status are separate things and Tom is continuing to email about that agreement.

At 6:34 we moved onto the 518 Game Changers education update. As mentioned in previous minutes they're looking to build up lesson content inside a learning management system across a variety of topics including our lessons as an intro to game development. We want to make sure that the content there stands alone and works well as a self paced unit. There are some potential risks mainly having to do with the time frame and making sure that the licensing works nicely and we retain ownership of the curriculum.

In general we do need to figure out how to share access to our curriculum to other future groups as well. Heath and Tom both are trying to remember what they've used in the past. Something like an HR training system or an online course system.

We're currently thinking that the 518 system would have to be linking to our content elsewhere. They'll have to send over an agreement for us to agree to but we'll need to do so.

Jumping back to Questar for a last point, it would be helpful to the class if we're able to find some potential candidates to apply to the role. They just put out a posting and need to find someone in the next couple of weeks.

6:52 We moved onto discussing the CoE grant. We have a list of priorities but considering the year is running out we may need to reprioritize what can be accomplished in the fourth quarter of the year. This has happened before and although it's not optimal we've prioritized improvements

Previous priorities:

Potential CoE grant subaward budget items:

- Executive Director salary (increase total hours to be full-time)
- Website overhaul
- Curriculum development for a production and/or bizdev focused class unit
- Bringing back Lift Off diversity incubator program
- Bringing back ProtoStar prototyping fund and game pitch competition
- Equipment upgrades for TVGS coworking office

Additional suggestions:

- Any strategy to improve volunteer recruitment
- Budget use for more in-person events, especially showcases/playtesting sessions

It seems likely that we should delay the executive director funding usage until a future year when we have the contract signed sooner in the year rather than trying for it now and then leaving a potential gap or lack of coverage until the first quarter of next year.

Potentially we could prioritize curriculum development and finding an LMS service for our own curriculum which would help us grow a recurring income to be able to support future plans for an executive director without going from grant to grant.

Could involve hiring a contractor to develop more curriculum or the website further.

A potential priority ordering for things that can be done by the end of the year:

- Educational stuff (LMS, curriculum development for a production and/or bizdev focused class unit)
- Legal costs
- Website overhaul
- Equipment upgrades for TVGS coworking office
- Budget use for more in-person events, especially showcases/playtesting sessions
- Bringing back ProtoStar prototyping fund and game pitch competition

7:11 Up to uploading approved minutes from Jordan's time as secretary, still need to check the older minutes are approved before uploading them. After discussion with Jamey he additionally hid the navigation tabs for ProtoStar and Liftoff because they are out of date, but the links will still work. You can still review previous minutes here: https://web.archive.org/web/20260308071000/https://www.techvalleygamespace.org/

7:14 Started discussing the TVCoG MoU. We would like to get this signed so we can open up coworking to new members again. We also need to figure out who will have 24/7 access to the space and how to schedule access to the space for other members.

We also need to figure out how to schedule the members who have access.

7:24 Missions and Visions statements we'd like to get more answers back from board members. The email subject line is `Survey for TVGS 1/3/5-years goals, year 2026` Taro is also more than happy to send a new email out (and already had to for a few members where the email didn't get delivered correctly)!

7:31 Jordan motions to adjourn the meeting, Tom seconded. 4 ayes no nayes.
Meeting has been adjourned at 7:31 PM EDT.

Jordan Faas-Bush

TVGS Secretary of the Board
